# KOSMIC™ Kale

## **KOSMIC™ Kale**

The newest cool addition to your edibles program! Unusual, ornamental edible from Dick Degenhardt of the Netherlands has out-of-this-world coloring, with blue-green leaves edged in cream.

Plants are beautiful in mixed beds or containers, and provides a continuous harvest of delicious, nutritious, eye-catching greens for garnish, salad, or steaming.

Hardy to 10°F  
18–24”h x 30–36”w

## **POT SIZE**

Quart or gallon pots

## **CROP TIME**

4–6 weeks to finish for quart pots in spring, 6–8 weeks for gallon containers. Faster crop times are likely in summer.

## **PLANTING**

Plant one liner per pot

## **SOIL MIX**

Standard peatlite mix recommended, neutral pH, good water and nutrient retention. Keep uniformly moist and well-fertilized to prevent yellowing of older foliage.

## **TEMPERATURE**

Start warm (70–75°F) to establish and bulk, then finish cooler (55–60°F). Later crops can be grown outdoors in full sun after risk of late frosts has passed.

## **LIGHT LEVELS**

Full to partial sun
