+ pillow™ series]

Oxalis Allure™ Series

OXALIS TRIANGULARIS HYBRID

The Allure Series flaunts colorful shamrock leaves in luxurious colors, with white or pink flowers in spring, summer and fall. Grown as a pot plant or part of a spring mix, these varieties are more uniform in habit and vigor than any other series on the market. Perfect in 4½" pots or in mixed containers. Hardy Zones 7-11.

Pictured left:

ALLURE BURGUNDY

Rich burgundy-purple foliage with pastel-pink flowers.

ALLURE EBONY

Ink-black foliage with stark white flowers.

ALLURE LAVENDER

Lilac-pink foliage with pure white flowers.

ALLURE MAHOGANY

Warm mahogany-brown foliage with pink flowers.

ALLURE SILVER

Metallic jade-green foliage and pink flowers.

POT SIZES: One liner per 4" pot to 1 gallon pot.

PLANTING: Pot February-March for sales in April-May.

SOIL MIX: Well-drained peatlite mix, neutral pH, good water and nutrient retention.

LIGHT: Best when grown under light shade. Flower initiation is continuous, but more profuse after a cooling period.

TEMPERATURE: Start at 68-72°F until rooted to sides of pot, then finish at 55-65°F.

CROP TIME: 6-8 weeks for 4½" and quart pots. 12-14 weeks for 1 gallon pots. Year-round pot plant production.

Oxalis Pillow™ Series

OXALIS CRASSIPES HYBRID (SYN. AURICULATA)

This is an incredibly long-blooming, hardy perennial series of sterile Oxalis hybrids that boast a neat, mounded habit, beautiful apple-green foliage and hundreds of flowers covering the plant just above the foliage from spring to late fall. The Pillow Series is excellent in 4½" pots, mixed combos or hanging baskets. It's propagated from tissue culture, and therefore completely uniform and clean. Fast to finish, profitable to grow. Hardy Zones 5-11.

Pictured right:

OXALIS PINK PILLOW

Bright pink flowers, compact habit.

OXALIS WHITE PILLOW

Pure snow-white flowers, compact habit.

POT SIZES: One liner per 4½" pot to 1 gallon pot.

PLANTING: Pot January-March for sales in April-June.

SOIL MIX: Well-drained peatlite mix, neutral pH, good water and nutrient retention.

LIGHT: Best when grown under full sun or light shade. Flower initiation continuous, independent of day length.

TEMPERATURE: Start at 68-72°F until established, then finish at 55-65°F.

CROP TIME: 6-8 weeks for 4½" and quart pots. 10-12 weeks for 1 gallon pots. Sale of finished product April-June.
