## low maintenance | big impact

Beautiful, weird, hairy, smooth, dainty, flowering, fleshy, mottled, streaked, houseplants, garden plants, container plants. Succulents are amazingly multi-talented. And with sustainability the new watchword, varieties in this ancient family are suddenly the hottest group around. From creating diminutive dish gardens to lunar-like landscapes, succulents give environmentally aware gardeners a nearly **unlimited palette of colors, textures, and shapes**.

That's why we've created the Mosaics collection. It contains the **premium plants** your customers want in a diverse array of colors, textures, and shapes. And because they're from **Plug Connection**, you can count on their quality and affordability – and our one-to-one service.

# high | lights

Nowhere else in North America are the light levels higher than here in Vista, California. Toned and hardened by the sun and cool Pacific breezes, our plants are **exceptionally compact and vigorous**. The result? Shorter crop times for you, easy care for your customers, and **increased profits** for both.
