

tessera™  
succulents

collection 2010

## high aesthetics | low maintenance

**Beautiful and bizarre, gripping and groundbreaking.** Like interlocking elements of ancient art, succulents bring brilliance and depth to any home or garden they inhabit. Succulents are also rich with purpose, offering eco-conscious gardeners a bountiful palette of **water-smart possibilities**.

That was the inspiration behind **the Tessera collection**. Named for the luminous embellishments found in classic mosaic artwork, it contains the premium plants your customers want in a diverse array of colors, textures and shapes. And because they're **from Plug Connection**, you can count on the quality, affordability and service that comes with this masterpiece collection.

# high | lights

Nowhere else in North America are the light levels higher than here in Vista, California. Toned and hardened by the sun and cool Pacific breezes, our plants are **exceptionally compact and vigorous**. The result? Shorter crop times for you, easy care for your customers, and **increased profits** for both.
